# Great performance is built in

Unplanned downtime because of a filter problem? That is never OK. Our products are too big an investment to allow that kind of thing to happen. Use John Deere Filters to keep the dirt out. We offer top-of-the-line filters to help deliver superior performance season after season.

## A part of the whole. The important parts

John Deere Oil Filters. Fuel Filters. Air Filters. Hydraulic Fluid Filters. Take a good look at our filter options. We've got you covered. You'll find that simply choosing John Deere Filters can up your productivity, reduce maintenance costs and extend the life of your equipment.

## John Deere Oil Filters

Dirty oil causes unwanted wear, shorter engine life and can lead to unplanned downtime. The kind that stops productivity in its tracks. Don't let dirty oil compromise your engine performance. Be sure to use John Deere Oil Filters. The close mesh is engineered to catch small particles, including dirt and other contaminants before they can pollute your engine. In fact, these filters are designed and tested to capture more dust than lesser quality filters. Right down to the smallest particle.

*With John Deere Oil Filters, count on:*

---

**Even pleats and media spacing.** To ensure even filtration for better overall protection without gaps

---

**Spiral and crimped center tube.** To add strength to prevent media from collapsing and letting unwanted particles into your system

---

**Rubber gaskets.** For a tighter seal than plastic gaskets found in competitive filters

---

**Exceptional performances.** To increase recommended drain interval to 500 hours when used with John Deere Plus-50™ II\*

---

**Ready for today and tomorrow.** Tier 4 engine compliance readiness

---

*What to watch out for in an oil filter:*

---

If the filter does not have adequate dirt holding capacity, dirty oil will begin to bypass the filter prior to the filter change interval

---

The bypassing of the filter will allow debris into the engine causing unnecessary wear and tear and, potentially, unplanned downtime

---

**JOHN DEERE  
OIL FILTERS**

**+ PLUS-50™ II  
ENGINE OIL**

**500 HOURS FREE  
OF DOWNTIME**

When you pair John Deere Oil Filters with premium Plus-50™ II Engine Oil, there's no stopping you for 500 hours! Because John Deere Engineers design our maintenance products to work to defend your machine from harsh conditions and wear. Plus, both John Deere Filters and Plus-50™ II are ready to protect new Tier 4 engines.

Don't take your equipment to the field without this winning combo. Trust John Deere Filters and oil to help your machines last.

\*500-hour drain interval applies to John Deere Diesel Engines when the following criteria are met: 1. Engine is equipped with an extended drain interval oil pan, 2. Machine operates with Plus-50 II Engine Oil API CK-4/SN. 3. Machine uses a John Deere Engine Oil Filter, 4. Machine uses only ultra low sulfur diesel fuel.

# John Deere Fuel Filters

When it comes to your fuel, water is public enemy number one. Let John Deere Fuel Filters serve and protect. Not only have our fuel filters been developed to trap water, they have been tested and proven to repel it. That's because John Deere Fuel Filters are designed with a coated media that keeps water out, preventing rust and microbial growth that could damage your fuel and lead to poor fuel economy.

## Don't mix with water

---

Tight pleats and even media spacing ensure a high capacity to catch water and dust particles before they can damage your fuel

---

Coated media actually repels water and prevents it from soaking through to fuel the way uncoated media can

---

Tight seal between media and filter casing ensures unfiltered, dirty fuel won't reach the engine

---

# John Deere Air Filters

John Deere Air Filters are another high-quality line of defense against contaminants invading your engine. These filters reduce engine wear by removing dust, dirt, and other pollutants during the engine's intake of air. You'll find our filters highly efficient when it comes to trapping unwanted particles. So, breathe easy.

## Clean air is not just an Act

*John Deere Air Filters are on the cutting edge of design and function. With our filters, you'll get:*

---

**Even pleats and more media.** To ensure high efficiency and a longer time period between service intervals

---

**Proper airflow.** The design ensures a minimum flow restriction while capturing more contaminants than leading competitive air filters

---

**A tight seal.** To keep contaminants from bypassing the filter

---

# John Deere Hydraulic Filters

Keep contaminants out and prevent sludge and acid from damaging your hydraulic systems. Make John Deere Hydraulic Filters your first line of defense. These filters are designed specifically to protect John Deere Hydraulic Systems from component wear and hydraulic surge flow. Two big dangers your heavy-duty equipment faces during the life of your system.

## The glue that binds us

*With John Deere Hydraulic Filters, you can count on:*

---

**Even pleats.** For a higher capacity to catch and hold contaminants. The result? Longer intervals between service checks for basic maintenance

---

**Extra hot glue melts.** To strengthen media and ensure even spacing

---

## Fleetguard Filters for all your other makes and models

There's a whole fleet of equipment out there where not every piece of equipment is John Deere equipment. Strange, we know, but true. Still, we've got the right filter for you—Fleetguard Filters. These filters are perfect to take care of your non-green fleet and available at your local John Deere dealer.

Similar to Deere technology, Fleetguard's synthetic, multi-layered Stratapore™ Technology provides higher filter capacity, greater efficiency and less restriction than traditional filter media. And thanks to the wide range of Fleetguard Replacement Filters that meet or exceed most original equipment manufacturer (OEM) specs, you can take advantage of Stratapore Technology for almost any application, including, heavy-, medium- and light-duty trucks as well as industrial equipment for construction, mining, agriculture and marine applications.

### Every heavy-duty piece of equipment deserves protection.

#### Even non-John Deere models

*With Fleetguard Filters, you'll get a:*

---

Synthetic, multi-layered Stratapore Medium Technology with a high capacity, great efficiency and less restriction than traditional media

---

Wide range of replacement filters that meet or exceed other OEM specifications for almost any diesel engine

---

An extensive selection. Hydraulic, transmission, fuel, air and fuel/water separator filters are available

---

Best in the industry warranty—no proration and fully protected no matter the brand or equipment model application

---

## The really, really, really important part. Order now

Protect your heavy-duty equipment with filters that have been designed, tested and proven for your John Deere Fleet. Keep your non-John Deere Fleet protected as well. Talk to your local John Deere dealer today.
